4. MENU MAP.....	8
5. ERROR CODE.....	13
6. DMX CHARTS.....	14
7. MAINTENANCE.....	34

Every fixture has been thoroughly tested and has been shipped in perfect operating condition. All users shall strictly comply with the safety notes and operation instructions set forth in this user manual. Any damage caused by misuse is not covered by the Cindy's guarantee. Distributor is not responsible for the failure and problems caused by neglect of the user manual. The relevant information in this user manual is for reference only. All lighting products are subject to the real product. If there is any change without prior notice, the company will reserve the right of final interpretation.

For the latest software, hardware, documents and other information, please visit: www.cindylight.com or follow CINDY_GROUP via Wechat.

1. SAFETY WARNING

1. **CAUTION!** The optics in this fixture may concentrate sunlight on the internal of the fixture, causing damage or fire. **DO NOT** expose the fixture or front lens to the light beams from direct sunlight at any time.
2. Carefully unpack the product immediately and check if all the parts are in the package and in good condition, in case the fixture is damaged by transportation.
3. This fixture is an extremely sophisticated piece of electronic equipment. Please make sure every person involved with installation and maintenance of this fixture has to be qualified and should follow the instructions in this manual. **Do not** attempt any repairs yourself.
4. The maximum ambient temperature is 45°C, and minimum ambient temperature is -5°C. Please **DO NOT** operate this fixture at higher or lower temperatures.
5. The fixture must be mount in a location with adequate ventilation.
6. Make sure that the available voltage is not higher than stated on the spec sticker, and with correct protection for over-load and electric leakage .
7. This fixture must be mount at least 0.5m from adjacent surface.
8. Always connect the fixture to a grounded circuit to avoid the risk of electrocution.
9. For overhead installation, this fixture must be always secured with a safety cable that can bear at least 10 times the weight of the fixture.
10. Make sure this fixture is mount away from any flammable material. The minimum distance to any flammable material is 0.5m.
11. Make sure the fixture uses the correct fuse.
12. Make sure there is no flammable material, water, metal or other things entering the fixture to avoid fire or electrocution. Disconnect the power

immediately if it happens.

13. Never touch the fixture during its operation as the housing becomes very hot and there are a lot of moving parts.
14. Minimum distance to lighted objects is 10 meters.
15. To maintain optimum performance and minimize wear, clean this fixture frequently. Usage and environment are contributing factors in determining the cleaning frequency.
16. If the housing, optics or other parts are damaged, stop using the fixture immediately and contact trained technicians for repairs. **DO NOT** replace parts that are not from the original manufacturers.
17. When power linking other fixtures, make sure the power linking is done according to the specific standards and quantities.
18. Lamp product instructions (specific for product in which the light source is lamp):
19. **DO NOT** install lamp that is not the same as the original part to avoid danger or damage to the fixture.
20. **NEVER** use damaged lamp
21. Replace the lamp in time when the lamp is damaged, or exceed lifetime.
22. **CAUTION!** Never power off the fixture if the lamp is on, or it will damage the lamp. Set the lamp off for 5 minutes before cutting off the power. It's not covered by warranty if the lamp is damaged because of the above reason.

2. SPECIFICATION

1. Input Voltage: AC 100V-240V 50/60Hz
2. Power: 412W
3. Light Source: 19×20W RGBW LED
4. Channel Signal: DMX512 15/17/22/33/54/56/33(MS)/54(MS)
5. Colour: RGBW color mixing system
6. Strobe: 0~25Hz selectable multiple strobe effects with different speeds
7. Dimmer: 0~100% electronics
8. Zoom: Motorized
9. Pan range: 540° 8bit/16bit
10. Tilt range: 260° 8bit/16bit

3. INSTALLATION

The applicable temperature for the device is between -5°C to 45°C . Any operation outside of this temperature range may cause the fixture not functioning properly or even damage to the light source and other components. Installation operation, or servicing must be carried out by qualified technicians. To maintain optimum performance and minimize wear, make sure the fixture and all safety related factors is checked in proper intervals.

3.1 Mounting

- 1、 Before mounting this fixture, make sure the rigging point, all safety cables and clamps are in good conditions, and can bear at least 10 times the weight of the fixture plus whatever accessory attached.
- 2、 Insert the quick-lock fasteners of the clamp into the respective holes on the bottom of the fixture. Tighten the quick-lock fasteners fully clockwise.
- 3、 Pull the safety cable through the handle of the base and over the trussing system or another suitable rigging point. Insert the end into the carabiner and tighten the safety screw.

4、 Make sure the pan and tilt of the fixture is unlocked, and no flammable material within 0.5m from the fixture.

3.2 DMX-512 CONTROL CONNECTION

1、 XLR CONNECTORS

Please link this product to a DMX controller using a 3-pin DMX connection.

Please insert the male connector of the XLR cable into the signal output port of the controller, and insert the female connector of the XLR cable on the rear panel of this fixture. Multiple fixtures can be connected in series as the below picture shown.

Link to a controller

XLR cable pin connection

2、 DIRECT CABLE CONNECTIONS

Please connect cables as picture shown below to ensure proper connections and ideal waterproof effects.

**ATTENTION:**

- (1) Over long runs can be necessary to insert a DMX level matching amplifier.
- (2) The screened parts of the cable (sleeve) must never be connected to the system's earth, as this would cause faulty fixture and controller operation.
- (3) Unused cable ends must be protected by covers offered by the factory.

3.3 POWER AND WIRING

Make sure that the available voltage is not higher than stated on the spec sticker, and with correct protection for over-load and electric leakage. Make sure the product has an appropriate electrical ground to avoid the risk of electrocution or fire.

Fixtures can shipped with either AC plug version or direct cables version based

on different applications.

1、 AC PLUG

2、 DIRECT CABLES

Make sure the sealing gasket is present for safety reasons.

Unused cable ends must be protected by covers offered by the factory.

Please connect cables as picture shown below to ensure proper connections and ideal waterproof effects.

7. MAINTENANCE

Cleaning the fixture can maintain optimum performance of the fixture. Cleaning frequency can be determined by environment and usage. Damage caused by excessive dust, smoke fluidity, abnormal usage and unreasonable maintenance is not covered by the warranty.

1. Check the plastic covers, optics and light source. If they are damaged, please replace immediately.
2. Ensure all the screws are fastened.
3. Check wiring for signs of aging.
4. Clean all the optics with ammonia-free glass cleaner.
5. Ensure all the vents are dust-free and no objects blocking it.
6. Ensure there is no objects inside the fixture.
